△ MyTAG®

PROTECTING PEOPLE, PROPERTIES AND ASSETS

MyTAG provides trusted Proof of Presence, Proof of Compliance and security safeguarding solutions.

Patented NFC technology that is simple to use, fully audited and secure.

Unlike Barcode/QR Code systems, MyTAG technology cannot be copied or cloned.

Secure cloud-based solutions replace outdated technologies and paper-based processes.

SECURE NFC

SERVICES INCLUDE

KEY AND ASSET MANAGEMENT

MyTAG Asset Management can be used to check-out any asset (including keys) and makes the user fully accountable for its return. With automatic text and email notifications, the system will chase up late returning assets, saving you time and money.

PROOF OF COMPLIANCE

Trusted NFC Tags® prove scheduled audits on assets have been completed, this ensures consistent compliance with legislation and regulations. Exception reports ensure missed or due checks are highlighted to management via daily email summaries.

POSTROOM

MyTAG's flexible post room system delivers secure management of any type of inbound and outbound mail. Realtime mail notifications, full oversight of the chain of custody, mail trend analysis and all at a significantly lower operating cost than its peers makes MyTAG Postroom a compelling proposition for any commercial or residential site.

Post Room

DAILY OCCURRENCE LOG

Any incident, no matter how big or small, can be reported into our digital daily occurrence log either in realtime at the incident location or retrospectively at the desktop. Incidents can be organised into customisable categories and reviewed in our tailored reporting tool which can filter data such as high incident days, incident type/location/reporter to highlight trends for future planning.

LONE WORKER

A user-friendly, low risk system to help ensure the safety of any person working alone providing peace of mind to the employee and employer.

PROOF OF PRESENCE

MyTAG Proof of Presence provides guaranteed proof through its patented Trusted technologies that a person was present or an activity was performed at a predetermined location at a specific time and date. Used in a range of industries where proof of presence is critical to management oversight it is easily customized to any business process.
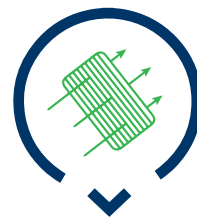

PROOF OF ID

Our secure identity card system uses Trusted NFC cards®, which cannot be copied or cloned provide absolute authentication of proof of ID. Supporting images/documents/permits/training certificates/accreditations can be held securely within the card and can be updated remotely through the MyTAG card management system.

AIR QUALITY MONITORING

MyTAG's air quality monitoring system can measure indoor and outdoor air quality in any building. A simple to install and low cost solution that ensures the health and wellbeing of occupants and visitors, and all easily monitored with a simple, shareable app.

TIME AND ATTENDANCE

MyTAG's easy to use time and attendance system delivers a trusted and accurate timestamp of each employees' working hours using our NFC tags. All data is captured within our reporting tool for review and trend analysis and can be exported into Excel for payroll purposes.

ELMA

Any training course needed for contractor, employees or tenants is only a tap away with our e-learning system, which can be run from your smartphone or computer. Customise with your requirements, your wording and your branding.

MyTAG®

Key Aims and Features

- Cloud-based, easy to use and simple to install with plug and play operation.
- Replaces outdated processes which rely on labour intensive and paper-based systems.
- Patented NFC technology, which cannot be copied or cloned unlike basic NFC, QR codes or barcodes.
- Ongoing innovation led by our clients and users.
- Systems can be combined in flexible modules to meet all clients needs, allowing the oversight of all business management processes in one platform.
- Real-time incident and escalation reports, shared via a single dashboard and via real-time and end-of-day email summaries.

- Reports by exception via email notifications and summaries.
- Historical data accessible 24/7/365 through the MyTAG cloud system.
- Unlimited number of system users and administrators.
- MyTAG has an ongoing commitment to further system development and innovation.
- No hidden costs.
- No cost - online training courses.
- ISO 27001 certified.

The MyTAG system now processes more than 1/2 million taps a month. We believe MyTAG is currently the largest global transactor of non-payment NFC swipes.

ASSETTRACK

MyTAG®

KEY AND ASSET MANAGEMENT

Sign an asset out, set a time and date for return and the system will provide automatic text and email reminders to the temporary asset holders.

No more searching through log books, deciphering handwriting and chasing late returns – *Access real-time digital logs of who is holding your assets and when they will return!*

Save time, money and move away from paper-based processes.

Used flexibly for keys, radios, contractor passes, body cameras and even umbrellas!

Preloaded information on tenants, staff and contractors, limiting the amount of time spent checking out an asset.

Full asset list.

24/7 Lost and found service included.

MyTAG Asset Management can be used for any asset that is being lent to a colleague, tenant or contractor that needs returned.

ASSETTRACK

PROOF OF PRESENCE

Our NFC tags, which cannot be copied or cloned, give guaranteed proof that a user was at specified location and at a specified time.

MyTAG captures information even without Wi-Fi or mobile network signal using any NFC device on iPhone or Android.

Ability to add documents and ask questions, accessible from the tap of a tag.

Live text, picture and video reports sent from the tap of a tag straight to system administrators in real time.

MyTAG technology cannot be cloned, providing guaranteed proof of location-based work.

Quick reporting of issues on site, easily accessible for review to users and administrators.

Start and end patrol points/cleaning routines are fully customisable, ensuring activities are completed consistently.
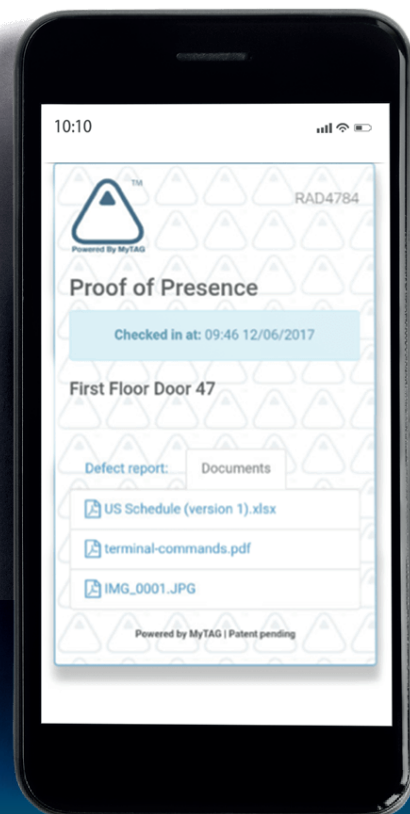

MyTAG's Trusted Proof of Presence is used for, but not limited to, security patrols, cleaning, proof of care visits and time and attendance.

ASSETTRACK

PROOF OF COMPLIANCE

Trusted proof of presence with added audit scheduling to deliver full compliance oversight of all assets and health and safety routines – asset tags outside of their compliance schedule automatically alert management via exception report, emails and on the MyTAG dashboard.

Daily email reports sent to system administrators ensure missed or due checks are highlighted.

Ability to add documents and audit questions accessible from the tap of a tag ensure full testing of assets.

Used for fire doors, extinguishers, first aid kits, PAT testing, water hygiene tests, care equipment and much more!
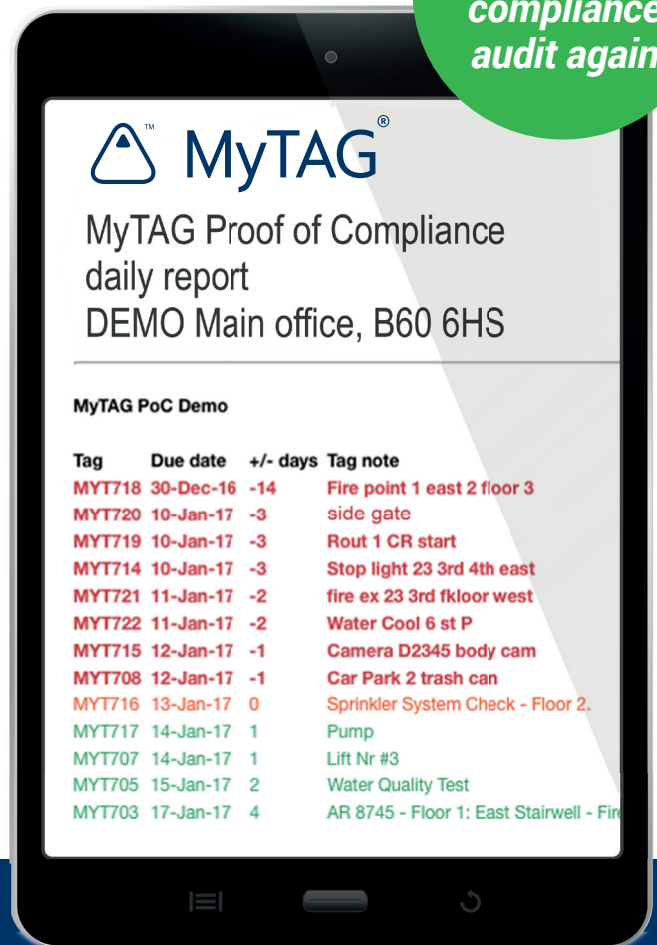

Real-time incident reporting ensures issues are quickly identified and reported to system administrators via email/dashboard in order to resolve issues swiftly.

24/7 Full back log of data available at all times - making auditing quick and painless.

Never miss an asset compliance audit again

POSTROOM

Post Room

Electronically receive, collect, sort and send mail from within your building. Manage your workflow and create digital tracking with full archived history.

Capture tracking information even without Wi-Fi or signal and upload in real time via our Deadzone app.

All records are digital, removing paper and saving time and money.

Customisable automated email notifications to inform tenants, clients and employees of collections and deliveries.

Fully customisable - with building locations, couriers, senders and recipient information.

App based system can be installed and operational within minutes. Simple to use and requires minimum training.

**24/7** Full reporting suite with signature capture, accessible at any time.

Barcode scanner and a tablet or device to sign for post and log deliveries throughout the building plus a unique barcode generator.

Our easy to use, low cost Postroom system allows you to securely manage and track inbound and outbound mail in any environment.

ASSETTRACK

DAILY OCCURANCE LOG (DOL)

Easy to use, customisable to your business operations.

Documents relating to an incident can be easily added, meaning detailed information is available in one place at any time.

Visual representation of high occurrence days allows for analysis of trends and need for review. Any occurrence, no matter how big or small, can be reported into our digital daily occurrence log, organised into customisable categories and reviewed in tailored reports.
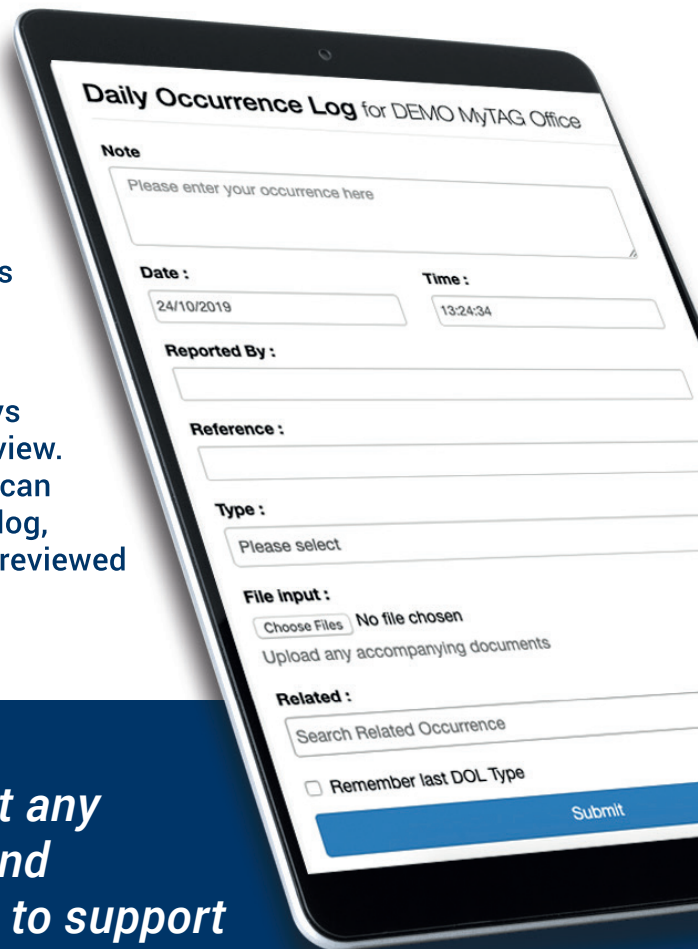

DOL makes it straightforward to report any issues which occur on site. Pictures and documents can be attached to entries to support image-based evidence and create a full record.
